

Global Best Ex & TCA

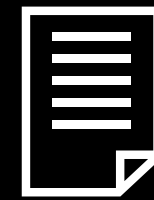

S3's Global TCA tool uses our industry-leading software to compare client executions to numerous benchmarks and allows you to evaluate your trading strategies for achieving best execution in all jurisdictions around the world. The tool supports domestic firms executing outside the US, as well as non-US firms executing worldwide, in equities, options, or fixed income.

readily examine equity, options, or fixed income execution quality
using a variety of customizable metrics and benchmarks

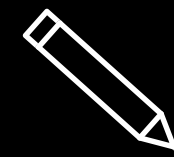

compare statistics using multiple, customizable categories, such as market cap, size buckets, side, or notional value

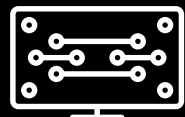

customize and schedule automated reports to be delivered directly to your inbox - for your review or to share with your clients

evaluate execution quality metrics with the flexibility to easily navigate between different time zone references

review data in a single currency (e.g. US Dollars or Euros) or the local currency of the transaction

use a wide variety of benchmarks to examine your trading behavior and make adjustments to achieve optimal performance

review your data using a high-level graphical summary of trends, or drill into the detail of each trade
